

TRAVEL THROUGH PICTURES

Insights and humor from the Intrepid Amateur

www.TravelThroughPictures.com

Starting Point Settings

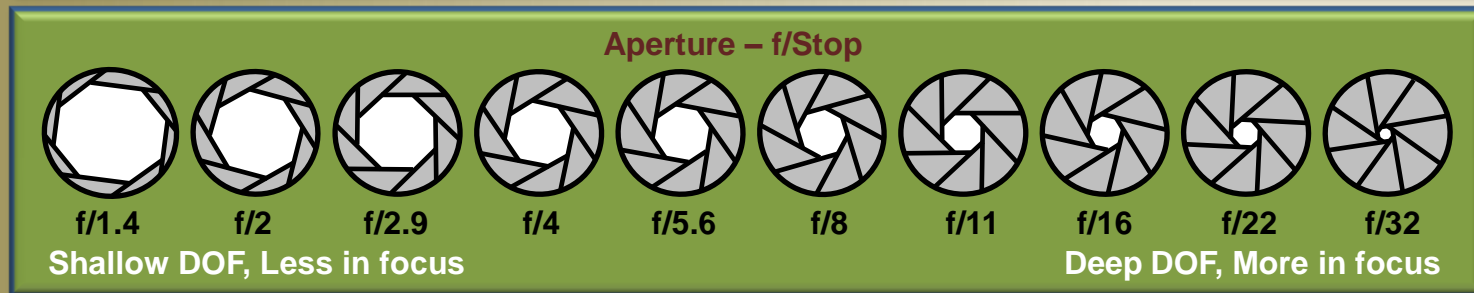

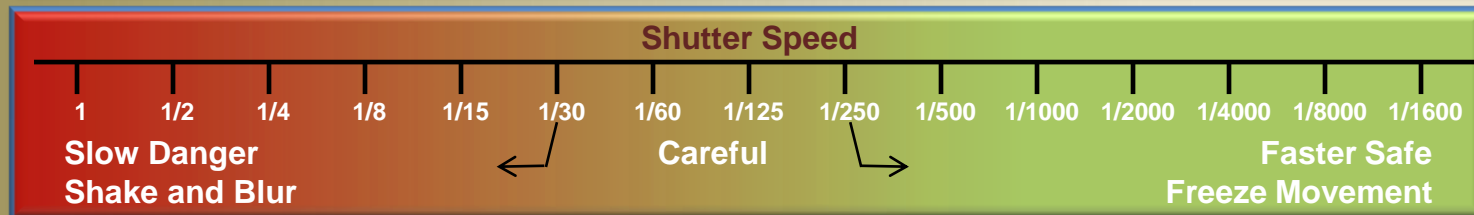

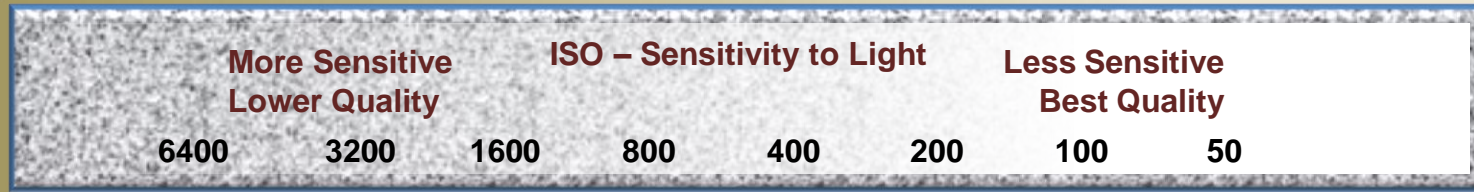

- **Av** = Aperture priority mode
 - **f/5.6** = Initial setting
 - **You** then set the aperture
- **ISO400** = Sensitivity to light
- **Center Weighted** metering
- **Center Focus Point** only
- **Back Button Focus** only
- **Continuous** Shooting
- **RAW** only

Tips

- Keep shutter speed above 1/125:
 - *If too slow, below 1/30, open aperture (smaller number)*
 - *If still too slow, increase ISO (larger number)*
- If sunny, lower ISO to improve picture quality
- To blur background, open aperture (*smaller f number*)
- To sharpen background, close aperture (*higher f number*)
- For action shots and no blur, increase shutter speed to greater than 1/1000 by:
 - *Opening aperture (smaller f number); and or,*
 - *Increasing ISO (reduces picture quality)*
